Cylinders
Unsteady Reynolds Averaged Navier–Stokes Method for Free-Surface Wave Flows around Surface-Piercing Cylindrical Structures — Shin Hyung Rhee; 135 (4), 135-43 (2009).

Scaled Boundary FEM Model for Interaction of Short-Crested Waves with a Concentric Porous Cylindrical Structure — Longbin Tao, Hao Song, and Subrata Chakrabarti; 135 (5), 200-12 (2009).

Data analysis
Grid Point Pooling in Extreme Value Analysis of Hurricane Hindcast Data — John C. Heideman and Douglas A. Mitchell; 135 (2), 31-7 (2009).

Decks
Wave-Induced Pressures and Forces on Deck Slabs near the Free Surface — K. Murali, V. Sundar, and Kannayya Setti; 135 (6), 269-77 (2009).

Delaware
Hydraulic Study of the Chesapeake and Delaware Canal — Nicholas Dudley Ward, Jeffrey A. Gebert, and J. Richard Weggel; 135 (1), 24-30 (2009).

Design
Grid Point Pooling in Extreme Value Analysis of Hurricane Hindcast Data — John C. Heideman and Douglas A. Mitchell; 135 (2), 31-7 (2009).

Dikes
Case Study of Undrained Strength Stability Analysis for Dredged Material Placement Areas — Timothy D. Stark, Hangseok Choi, and Chulho Lee; 135 (3), 91-9 (2009).

Dispersion
Parameterization of Neutrally Buoyant Horizontal Round Jet in Wave Environment — Kuang-An Chang, Yonguk Ryu, and Nobuhito Mori; 135 (3), 100-7 (2009).

Dredge spoil
Case Study of Undrained Strength Stability Analysis for Dredged Material Placement Areas — Timothy D. Stark, Hangseok Choi, and Chulho Lee; 135 (3), 91-9 (2009).

Effects of Lime-Clay Modification on the Consolidation Behavior of the Dredged Mud — M. Salehi and N. Sivakugan; 135 (6), 251-8 (2009).

Dredging
Time-Dependent Deformation of Dredged Harbor Mud Used as Backfilling Material — Benjamin Friedrich Schlue, Stefan Kreiter, and Tobias Moerz; 135 (4), 154-63 (2009).

Dunes
Berm and Dune Erosion during a Storm — Nobuhisa Kobayashi, Mitchell Buck, Andres Payo, and Bradley D. Johnson; 135 (1), 1-10 (2009).

Empirical equations
Wave-Induced Pressures and Forces on Deck Slabs near the Free Surface — K. Murali, V. Sundar, and Kannayya Setti; 135 (6), 269-77 (2009).

Erosion
Berm and Dune Erosion during a Storm — Nobuhisa Kobayashi, Mitchell Buck, Andres Payo, and Bradley D. Johnson; 135 (1), 1-10 (2009).

Estuaries
Hydrodynamics and Cohesive Sediment Transport in the IJzer Estuary, Belgium: Case Study — Alessio Giardino, Elsy Ibrahim, Stefanie Adam, Erik A. Toorman, and Jaak Monbaliu; 135 (4), 176-84 (2009).

Fabrics
Effects of Lime-Clay Modification on the Consolidation Behavior of the Dredged Mud — M. Salehi and N. Sivakugan; 135 (6), 251-8 (2009).

Finite element method
Scaled Boundary FEM Model for Interaction of Short-Crested Waves with a Concentric Porous Cylindrical Structure — Longbin Tao, Hao Song, and Subrata Chakrabarti; 135 (5), 200-12 (2009).

Tidal Simulations for the Loxahatchee River Estuary (Southeastern Florida): On the Influence of the Atlantic Intracoastal Waterway versus the Surrounding Tidal Flats — Peter Bacopoulos and Scott C. Hagen; 135 (6), 259-68 (2009).

Floods
Storm-Wave Flow through Tidal Inlets and Its Influence on Bay Flooding — Jennifer L. Irish and Rafael Cañizares; 135 (2), 52-60 (2009).

Variable-Height Bulkhead Design Concept for Storm Flood Protection — Chelsea J. Humbryd, Jennifer L. Irish, Diane S. Rahoy, Robert L. Alpern, and David N. Rackmales; 135 (6), 296-300 (2009).

Florida
Numerical Modeling of Dynamic Wave Force Acting on Escambia Bay Bridge Deck during Hurricane Ivan — Wenrui Huang and Hong Xiao; 135 (4), 164-75 (2009).

Tidal Simulations for the Loxahatchee River Estuary (Southeastern Florida): On the Influence of the Atlantic Intracoastal Waterway versus the Surrounding Tidal Flats — Peter Bacopoulos and Scott C. Hagen; 135 (6), 259-68 (2009).

Flow simulation
Surface Roller Model for the Numerical Simulation of Spilling Wave Breaking over Constant Slope Beach — Athanassios A. Dimas and Aggelos S. Dimakopoulos; 135 (5), 235-44 (2009).

Forecasting
Current Forecast for Tunnel-Element Immersion in the Bosphorus Strait, Turkey — Yukinobu Oda, Kazunori Ito, and Solomon C. Yim; 135 (3), 108-19 (2009).

Fourier analysis
Boussinesq Model for Weakly Nonlinear Fully Dispersive Water Waves — Theophanis V. Karambas and Constantine D. Memos; 135 (5), 187-99 (2009).

Fresh water
Tidal Circulation and Salinity Distribution in the Mandovi and Zuari Estuaries: Case Study — N. T. Manoj and A. S. Unnikrishnan; 135 (6), 278-87 (2009).

Gravity waves
Changes in Turbulent Flow Structure under Combined Wave-Current Motions — Motohiko Umeyama; 135 (5), 213-27 (2009).

Grid systems
Grid Point Pooling in Extreme Value Analysis of Hurricane Hindcast Data — John C. Heideman and Douglas A. Mitchell; 135 (2), 31-7 (2009).

Harbors
Two-Dimensional Physical Modeling of the Northern Breakwater of Leixões Harbor, Portugal: Case Study — F. Veloso Gomes, F. Taveira Pinto, E. Brogueira Dias, and H. Guedes Lopes; 135 (6), 288-95 (2009).

Hurricanes
Grid Point Pooling in Extreme Value Analysis of Hurricane Hindcast Data — John C. Heideman and Douglas A. Mitchell; 135 (2), 31-7 (2009).

Storm-Wave Flow through Tidal Inlets and Its Influence on Bay Flooding — Jennifer L. Irish and Rafael Cañizares; 135 (2), 52-60 (2009).

Numerical Modeling of Dynamic Wave Force Acting on Escambia Bay Bridge Deck during Hurricane Ivan — Wenrui Huang and Hong Xiao; 135 (4), 164-75 (2009).

Hydraulics
Hydraulic Study of the Chesapeake and Delaware Canal — Nicholas Dudley Ward, Jeffrey A. Gebert, and J. Richard Weggel; 135 (1), 24-30 (2009).

Hydrodynamic pressure
Wave-Induced Pressures and Forces on Deck Slabs near the Free Surface — K. Murali, V. Sundar, and Kannayya Setti; 135 (6), 269-77 (2009).

Impact forces
Wave-Induced Pressures and Forces on Deck Slabs near the Free Surface — K. Murali, V. Sundar, and Kannayya Setti; 135 (6), 269-77 (2009).

India
Tidal Circulation and Salinity Distribution in the Mandovi and Zuari Estuaries: Case Study — N. T. Manoj and A. S. Unnikrishnan; 135 (6), 278-87 (2009).

Laboratory tests
Two-Dimensional Physical Modeling of the Northern Breakwater of Leixões Harbor, Portugal: Case Study — F. Veloso Gomes, F. Taveira Pinto, E. Brogueira Dias, and H. Guedes Lopes; 135 (6), 288-95 (2009).

Lime
Effects of Lime-Clay Modification on the Consolidation Behavior of the Dredged Mud — M. Salehi and N. Sivakugan; 135 (6), 251-8 (2009).

Littoral currents
Suspended Sand Transport along Pier Depression — Andres Payo, Nobuhisa Kobayashi, and Fumihiko Yamada; 135 (5), 245-9 (2009).

Long waves
Waves Generated by a Pressure Disturbance Moving in a Channel with a Variable Cross-Sectional Topography — Tomas Torsvik, Geir Pedersen, and Kristian Dysthe; 135 (3), 120-3 (2009).

Mathematical models
Stochastic Model for Embayed Beaches — D. E. Reeve and Ying Li; 135 (4), 144-53 (2009).

Measurement
Hydrodynamics and Cohesive Sediment Transport in the IJzer Estuary, Belgium: Case Study — Alessio Giardino, Elsy Ibrahim, Stefanie Adam, Erik A. Toorman, and Jaak Monbaliu; 135 (4), 176-84 (2009).

Mixing
Solute Mixing in the Surf Zone — J. M. Pearson, I. Guymer, J. R. West, and L. E. Coates; 135 (4), 127-34 (2009).

Monsoon
Tidal Circulation and Salinity Distribution in the Mandovi and Zuari Estuaries: Case Study — N. T. Manoj and A. S. Unnikrishnan; 135 (6), 278-87 (2009).

Monte Carlo method
Nonlinear High Wave Groups in Bimodal Sea States — Felice Arena and C. Guedes Soares; 135 (3), 69-79 (2009).

Morphology
Stochastic Model for Embayed Beaches — D. E. Reeve and Ying Li; 135 (4), 144-53 (2009).

Mud
Time-Dependent Deformation of Dredged Harbor Mud Used as Backfilling Material — Benjamin Friedrich Schlue, Stefan Kreiter, and Tobias Moerz; 135 (4), 154-63 (2009).

Effects of Lime-Clay Modification on the Consolidation Behavior of the Dredged Mud — M. Salehi and N. Sivakugan; 135 (6), 251-8 (2009).

Nearshore circulation
Storm-Wave Flow through Tidal Inlets and Its Influence on Bay Flooding — Jennifer L. Irish and Rafael Cañizares; 135 (2), 52-60 (2009).

New York
Storm-Wave Flow through Tidal Inlets and Its Influence on Bay Flooding — Jennifer L. Irish and Rafael Cañizares; 135 (2), 52-60 (2009).

Numerical analysis
Hydraulic Study of the Chesapeake and Delaware Canal — Nicholas Dudley Ward, Jeffrey A. Gebert, and J. Richard Weggel; 135 (1), 24-30 (2009).

Numerical models
Numerical Modeling of Dynamic Wave Force Acting on Escambia Bay Bridge Deck during Hurricane Ivan — Wenrui Huang and Hong Xiao; 135 (4), 164-75 (2009).

Hydrodynamics and Cohesive Sediment Transport in the IJzer Estuary, Belgium: Case Study — Alessio Giardino, Elsy Ibrahim, Stefanie Adam, Erik A. Toorman, and Jaak Monbaliu; 135 (4), 176-84 (2009).

Boussinesq Model for Weakly Nonlinear Fully Dispersive Water Waves — Theophanis V. Karambas and Constantine D. Memos; 135 (5), 187-99 (2009).

Ocean water
Nonlinear High Wave Groups in Bimodal Sea States — Felice Arena and C. Guedes Soares; 135 (3), 69-79 (2009).

Offshore structures
Wave-Induced Pressures and Forces on Deck Slabs near the Free Surface — K. Murali, V. Sundar, and Kannayya Setti; 135 (6), 269-77 (2009).

Open channel flow
Hydraulic Study of the Chesapeake and Delaware Canal — Nicholas Dudley Ward, Jeffrey A. Gebert, and J. Richard Weggel; 135 (1), 24-30 (2009).

Parameters
Acceleration and Skewness Effects on the Instantaneous Bed-Shear Stresses in Shoaling Waves — Emanuele Terrile, Ad J. H. M. Reniers, and Marcel J. F. Stive; 135 (5), 228-34 (2009).

Piers
Unsteady Reynolds Averaged Navier–Stokes Method for Free-Surface Wave Flows around Surface-Piercing Cylindrical Structures — Shin Hyung Rhee; 135 (4), 135-43 (2009).

Suspended Sand Transport along Pier Depression — Andres Payo, Nobuhisa Kobayashi, and Fumihiko Yamada; 135 (5), 245-9 (2009).

Pollution
Solute Mixing in the Surf Zone — J. M. Pearson, I. Guymer, J. R. West, and L. E. Coates; 135 (4), 127-34 (2009).

Porous media
Scaled Boundary FEM Model for Interaction of Short-Crested Waves with a Concentric Porous Cylindrical Structure — Longbin Tao, Hao Song, and Subrata Chakrabarti; 135 (5), 200-12 (2009).

Pressure distribution
Waves Generated by a Pressure Disturbance Moving in a Channel with a Variable Cross-Sectional Topography — Tomas Torsvik, Geir Pedersen, and Kristian Dysthe; 135 (3), 120-3 (2009).

Regression analysis
Toe Scour of Seawall on a Steep Seabed by Breaking Waves — Ching-Piao Tsai, Hong-Bin Chen, and Shi-Song You; 135 (2), 61-8 (2009).

Current Forecast for Tunnel-Element Immersion in the Bosphorus Strait, Turkey — Yukinobu Oda, Kazunori Ito, and Solomon C. Yim; 135 (3), 108-19 (2009).

Regression models
Statistical Approach to Model the Deep Draft Ships' Squat in the St. Lawrence Waterway — Claudie Beaulieu, Samir Gharbi, Taha B. M. J. Ouarda, and Ousmane Seidou; 135 (3), 80-90 (2009).

Remote sensing
Hydrodynamics and Cohesive Sediment Transport in the IJzer Estuary, Belgium: Case Study — Alessio Giardino, Elsy Ibrahim, Stefanie Adam, Erik A. Toorman, and Jaak Monbaliu; 135 (4), 176-84 (2009).

Reynolds stress
Mean Velocity Changes due to Interaction between Bichromatic Waves and a Current — Motohiko Umeyama; 135 (1), 11-23 (2009).

Changes in Turbulent Flow Structure under Combined Wave-Current Motions — Motohiko Umeyama; 135 (5), 213-27 (2009).

Salinity
Tidal Circulation and Salinity Distribution in the Mandovi and Zuari Estuaries: Case Study — N. T. Manoj and A. S. Unnikrishnan; 135 (6), 278-87 (2009).

Sand
Berm and Dune Erosion during a Storm — Nobuhisa Kobayashi, Mitchell Buck, Andres Payo, and Bradley D. Johnson; 135 (1), 1-10 (2009).

Toe Scour of Seawall on a Steep Seabed by Breaking Waves — Ching-Piao Tsai, Hong-Bin Chen, and Shi-Song You; 135 (2), 61-8 (2009).

Suspended Sand Transport along Pier Depression — Andres Payo, Nobuhisa Kobayashi, and Fumihiko Yamada; 135 (5), 245-9 (2009).

Scour
Toe Scour of Seawall on a Steep Seabed by Breaking Waves — Ching-Piao Tsai, Hong-Bin Chen, and Shi-Song You; 135 (2), 61-8 (2009).

Sea floor
Toe Scour of Seawall on a Steep Seabed by Breaking Waves — Ching-Piao Tsai, Hong-Bin Chen, and Shi-Song You; 135 (2), 61-8 (2009).

Sediment
Time-Dependent Deformation of Dredged Harbor Mud Used as Backfilling Material — Benjamin Friedrich Schlue, Stefan Kreiter, and Tobias Moerz; 135 (4), 154-63 (2009).

Sediment transport
Berm and Dune Erosion during a Storm — Nobuhisa Kobayashi, Mitchell Buck, Andres Payo, and Bradley D. Johnson; 135 (1), 1-10 (2009).

Suspended Sand Transport along Pier Depression — Andres Payo, Nobuhisa Kobayashi, and Fumihiko Yamada; 135 (5), 245-9 (2009).

Shallow water
Statistical Approach to Model the Deep Draft Ships' Squat in the St. Lawrence Waterway — Claudie Beaulieu, Samir Gharbi, Taha B. M. J. Ouarda, and Ousmane Seidou; 135 (3), 80-90 (2009).

Waves Generated by a Pressure Disturbance Moving in a Channel with a Variable Cross-Sectional Topography — Tomas Torsvik, Geir Pedersen, and Kristian Dysthe; 135 (3), 120-3 (2009).

Shear stress
Acceleration and Skewness Effects on the Instantaneous Bed-Shear Stresses in Shoaling Waves — Emanuele Terrile, Ad J. H. M. Reniers, and Marcel J. F. Stive; 135 (5), 228-34 (2009).

Ship motion
Statistical Approach to Model the Deep Draft Ships' Squat in the St. Lawrence Waterway — Claudie Beaulieu, Samir Gharbi, Taha B. M. J. Ouarda, and Ousmane Seidou; 135 (3), 80-90 (2009).

Shoaling
Acceleration and Skewness Effects on the Instantaneous Bed-Shear Stresses in Shoaling Waves — Emanuele Terrile, Ad J. H. M. Reniers, and Marcel J. F. Stive; 135 (5), 228-34 (2009).

Simulation models
Surface Roller Model for the Numerical Simulation of Spilling Wave Breaking over Constant Slope Beach — Athanassios A. Dimas and Aggelos S. Dimakopoulos; 135 (5), 235-44 (2009).

Skewness
Acceleration and Skewness Effects on the Instantaneous Bed-Shear Stresses in Shoaling Waves — Emanuele Terrile, Ad J. H. M. Reniers, and Marcel J. F. Stive; 135 (5), 228-34 (2009).

Slabs
Wave-Induced Pressures and Forces on Deck Slabs near the Free Surface — K. Murali, V. Sundar, and Kannayya Setti; 135 (6), 269-77 (2009).

Slope stability
Case Study of Undrained Strength Stability Analysis for Dredged Material Placement Areas — Timothy D. Stark, Hangseok Choi, and Chulho Lee; 135 (3), 91-9 (2009).

Slopes
Surface Roller Model for the Numerical Simulation of Spilling Wave Breaking over Constant Slope Beach — Athanassios A. Dimas and Aggelos S. Dimakopoulos; 135 (5), 235-44 (2009).

Soft soils
Case Study of Undrained Strength Stability Analysis for Dredged Material Placement Areas — Timothy D. Stark, Hangseok Choi, and Chulho Lee; 135 (3), 91-9 (2009).

Soil consolidation
Time-Dependent Deformation of Dredged Harbor Mud Used as Backfilling Material — Benjamin Friedrich Schlue, Stefan Kreiter, and Tobias Moerz; 135 (4), 154-63 (2009).
Effects of Lime-Clay Modification on the Consolidation Behavior of the Dredged Mud — M. Salehi and N. Sivakugan; 135 (6), 251-8 (2009).

Soil permeability
Effects of Lime-Clay Modification on the Consolidation Behavior of the Dredged Mud — M. Salehi and N. Sivakugan; 135 (6), 251-8 (2009).

Soil strength
Case Study of Undrained Strength Stability Analysis for Dredged Material Placement Areas — Timothy D. Stark, Hangseok Choi, and Chulho Lee; 135 (3), 91-9 (2009).

Solitary waves
Waves Generated by a Pressure Disturbance Moving in a Channel with a Variable Cross-Sectional Topography — Tomas Torsvik, Geir Pedersen, and Kristian Dysthe; 135 (3), 120-3 (2009).

St. Lawrence River
Statistical Approach to Model the Deep Draft Ships' Squat in the St. Lawrence Waterway — Claudie Beaulieu, Samir Gharbi, Taha B. M. J. Ouarda, and Ousmane Seidou; 135 (3), 80-90 (2009).

Statistics
Grid Point Pooling in Extreme Value Analysis of Hurricane Hindcast Data — John C. Heideman and Douglas A. Mitchell; 135 (2), 31-7 (2009).
Statistical Approach to Model the Deep Draft Ships' Squat in the St. Lawrence Waterway — Claudie Beaulieu, Samir Gharbi, Taha B. M. J. Ouarda, and Ousmane Seidou; 135 (3), 80-90 (2009).

Storm surges
Storm-Wave Flow through Tidal Inlets and Its Influence on Bay Flooding — Jennifer L. Irish and Rafael Cañizares; 135 (2), 52-60 (2009).
Numerical Modeling of Dynamic Wave Force Acting on Escambia Bay Bridge Deck during Hurricane Ivan — Wenrui Huang and Hong Xiao; 135 (4), 164-75 (2009).
Variable-Height Bulkhead Design Concept for Storm Flood Protection — Chelsea J. Humbryd, Jennifer L. Irish, Diane S. Rahoy, Robert L. Alpern, and David N. Rackmales; 135 (6), 296-300 (2009).

Storms
Berm and Dune Erosion during a Storm — Nobuhisa Kobayashi, Mitchell Buck, Andres Payo, and Bradley D. Johnson; 135 (1), 1-10 (2009).

Structural stability
Two-Dimensional Physical Modeling of the Northern Breakwater of Leixões Harbor, Portugal: Case Study — F. Veloso Gomes, F. Taveira Pinto, E. Brogueira Dias, and H. Guedes Lopes; 135 (6), 288-95 (2009).

Submerging
Modeling of the Wave Setup Inshore of an Array of Submerged Breakwaters — Luciano Soldini, Carlo Lorenzoni, Maurizio Brocchini, Alessandro Mancinelli, and Lorenzo Cappietti; 135 (2), 38-51 (2009).

Surf zone
Berm and Dune Erosion during a Storm — Nobuhisa Kobayashi, Mitchell Buck, Andres Payo, and Bradley D. Johnson; 135 (1), 1-10 (2009).
Solute Mixing in the Surf Zone — J. M. Pearson, I. Guymer, J. R. West, and L. E. Coates; 135 (4), 127-34 (2009).

Surface waves
Unsteady Reynolds Averaged Navier–Stokes Method for Free-Surface Wave Flows around Surface-Piercing Cylindrical Structures — Shin Hyung Rhee; 135 (4), 135-43 (2009).

Suspended sediment
Hydrodynamics and Cohesive Sediment Transport in the IJzer Estuary, Belgium: Case Study — Alessio Giardino, Elsy Ibrahim, Stefanie Adam, Erik A. Toorman, and Jaak Monbaliu; 135 (4), 176-84 (2009).
Suspended Sand Transport along Pier Depression — Andres Payo, Nobuhisa Kobayashi, and Fumihiko Yamada; 135 (5), 245-9 (2009).

Tidal currents
Hydraulic Study of the Chesapeake and Delaware Canal — Nicholas Dudley Ward, Jeffrey A. Gebert, and J. Richard Weggel; 135 (1), 24-30 (2009).
Tidal Simulations for the Loxahatchee River Estuary (Southeastern Florida): On the Influence of the Atlantic Intracoastal Waterway versus the Surrounding Tidal Flats — Peter Bacopoulos and Scott C. Hagen; 135 (6), 259-68 (2009).
Tidal Circulation and Salinity Distribution in the Mandovi and Zuari Estuaries: Case Study — N. T. Manoj and A. S. Unnikrishnan; 135 (6), 278-87 (2009).

Topography
Waves Generated by a Pressure Disturbance Moving in a Channel with a Variable Cross-Sectional Topography — Tomas Torsvik, Geir Pedersen, and Kristian Dysthe; 135 (3), 120-3 (2009).

Turbulent diffusion
Parameterization of Neutrally Buoyant Horizontal Round Jet in Wave Environment — Kuang-An Chang, Yonguk Ryu, and Nobuhito Mori; 135 (3), 100-7 (2009).

Turkey
Current Forecast for Tunnel-Element Immersion in the Bosphorus Strait, Turkey — Yukinobu Oda, Kazunori Ito, and Solomon C. Yim; 135 (3), 108-19 (2009).

Undertow
Surface Roller Model for the Numerical Simulation of Spilling Wave Breaking over Constant Slope Beach — Athanassios A. Dimas and Aggelos S. Dimakopoulos; 135 (5), 235-44 (2009).

Underwater construction
Current Forecast for Tunnel-Element Immersion in the Bosphorus Strait, Turkey — Yukinobu Oda, Kazunori Ito, and Solomon C. Yim; 135 (3), 108-19 (2009).

Uplifting
Numerical Modeling of Dynamic Wave Force Acting on Escambia Bay Bridge Deck during Hurricane Ivan — Wenrui Huang and Hong Xiao; 135 (4), 164-75 (2009).
Wave-Induced Pressures and Forces on Deck Slabs near the Free Surface — K. Murali, V. Sundar, and Kannayya Setti; 135 (6), 269-77 (2009).

Velocity
Mean Velocity Changes due to Interaction between Bichromatic Waves and a Current — Motohiko Umeyama; 135 (1), 11-23 (2009).
Changes in Turbulent Flow Structure under Combined Wave-Current Motions — Motohiko Umeyama; 135 (5), 213-27 (2009).

Vortices
Surface Roller Model for the Numerical Simulation of Spilling Wave Breaking over Constant Slope Beach — Athanassios A. Dimas and Aggelos S. Dimakopoulos; 135 (5), 235-44 (2009).

Water flows
Unsteady Reynolds Averaged Navier–Stokes Method for Free-Surface Wave Flows around Surface-Piercing Cylindrical Structures — Shin Hyung Rhee; 135 (4), 135-43 (2009).

Water waves
Storm-Wave Flow through Tidal Inlets and Its Influence on Bay Flooding — Jennifer L. Irish and Rafael Cañizares; 135 (2), 52-60 (2009).
Parameterization of Neutrally Buoyant Horizontal Round Jet in Wave Environment — Kuang-An Chang, Yonguk Ryu, and Nobuhito Mori; 135 (3), 100-7 (2009).
Boussinesq Model for Weakly Nonlinear Fully Dispersive Water Waves — Theophanis V. Karambas and Constantine D. Memos; 135 (5), 187-99 (2009).

Waterways
Statistical Approach to Model the Deep Draft Ships' Squat in the St. Lawrence Waterway — Claudie Beaulieu, Samir Gharbi, Taha B. M. J. Ouarda, and Ousmane Seidou; 135 (3), 80-90 (2009).

Wave crest
Nonlinear High Wave Groups in Bimodal Sea States — Felice Arena and C. Guedes Soares; 135 (3), 69-79 (2009).

Wave diffraction
Scaled Boundary FEM Model for Interaction of Short-Crested Waves with a Concentric Porous Cylindrical Structure — Longbin Tao, Hao Song, and Subrata Chakrabarti; 135 (5), 200-12 (2009).

Wave groups
Nonlinear High Wave Groups in Bimodal Sea States — Felice Arena and C. Guedes Soares; 135 (3), 69-79 (2009).

Wave height
Nonlinear High Wave Groups in Bimodal Sea States — Felice Arena and C. Guedes Soares; 135 (3), 69-79 (2009).

Wave measurement
Modeling of the Wave Setup Inshore of an Array of Submerged Breakwaters — Luciano Soldini, Carlo Lorenzoni, Maurizio Brocchini, Alessandro Mancinelli, and Lorenzo Cappietti; 135 (2), 38-51 (2009).

Wave overtopping
Two-Dimensional Physical Modeling of the Northern Breakwater of Leixões Harbor, Portugal: Case Study — F. Veloso Gomes, F. Taveira Pinto, E. Brogueira Dias, and H. Guedes Lopes; 135 (6), 288-95 (2009).
Variable-Height Bulkhead Design Concept for Storm Flood Protection — Chelsea J. Humbryd, Jennifer L. Irish, Diane S. Rahoy, Robert L. Alp-

ern, and David N. Rackmales; 135 (6), 296-300 (2009).

Wave propagation

Waves Generated by a Pressure Disturbance Moving in a Channel with a Variable Cross-Sectional Topography — Tomas Torsvik, Geir Pedersen, and Kristian Dysthe; 135 (3), 120-3 (2009).

Surface Roller Model for the Numerical Simulation of Spilling Wave Breaking over Constant Slope Beach — Athanassios A. Dimas and Aggelos S. Dimakopoulos; 135 (5), 235-44 (2009).

Wave reflection

Toe Scour of Seawall on a Steep Seabed by Breaking Waves — Ching-Piao Tsai, Hong-Bin Chen, and Shi-Song You; 135 (2), 61-8 (2009).

Waves

Mean Velocity Changes due to Interaction between Bichromatic Waves and a Current — Motohiko Umeyama; 135 (1), 11-23 (2009).

Suspended Sand Transport along Pier Depression — Andres Payo, Nobuhisa Kobayashi, and Fumihiko Yamada; 135 (5), 245-9 (2009).

Author Index

Adam, Stefanie
Hydrodynamics and Cohesive Sediment Transport in the IJzer Estuary, Belgium: Case Study — Alessio Giardino, Elsy Ibrahim, Stefanie Adam, Erik A. Toorman, and Jaak Monbaliu; 135 (4), 176-84 (2009).

Alpern, Robert L.
Variable-Height Bulkhead Design Concept for Storm Flood Protection — Chelsea J. Humbryd, Jennifer L. Irish, Diane S. Rahoy, Robert L. Alpern, and David N. Rackmales; 135 (6), 296-300 (2009).

Arena, Felice
Nonlinear High Wave Groups in Bimodal Sea States — Felice Arena and C. Guedes Soares; 135 (3), 69-79 (2009).

Bacopoulos, Peter
Tidal Simulations for the Loxahatchee River Estuary (Southeastern Florida): On the Influence of the Atlantic Intracoastal Waterway versus the Surrounding Tidal Flats — Peter Bacopoulos and Scott C. Hagen; 135 (6), 259-68 (2009).

Beaulieu, Claudie
Statistical Approach to Model the Deep Draft Ships' Squat in the St. Lawrence Waterway — Claudie Beaulieu, Samir Gharbi, Taha B. M. J. Ouarda, and Ousmane Seidou; 135 (3), 80-90 (2009).

Brocchini, Maurizio
Modeling of the Wave Setup Inshore of an Array of Submerged Breakwaters — Luciano Soldini, Carlo Lorenzoni, Maurizio Brocchini, Alessandro Mancinelli, and Lorenzo Cappietti; 135 (2), 38-51 (2009).

Buck, Mitchell
Berm and Dune Erosion during a Storm — Nobuhisa Kobayashi, Mitchell Buck, Andres Payo, and Bradley D. Johnson; 135 (1), 1-10 (2009).

Cañizares, Rafael
Storm-Wave Flow through Tidal Inlets and Its Influence on Bay Flooding — Jennifer L. Irish and Rafael Cañizares; 135 (2), 52-60 (2009).

Cappietti, Lorenzo
Modeling of the Wave Setup Inshore of an Array of Submerged Breakwaters — Luciano Soldini, Carlo Lorenzoni, Maurizio Brocchini, Alessandro Mancinelli, and Lorenzo Cappietti; 135 (2), 38-51 (2009).
Hydrodynamics and Water Quality — 135 (4), 185 (2009).

Cerco, Carl F.
Book Reviews — Carl F. Cerco and Sung-Chan Kim; 135 (4), 185 (2009).

Chakrabarti, Subrata
Scaled Boundary FEM Model for Interaction of Short-Crested Waves with a Concentric Porous Cylindrical Structure — Longbin Tao, Hao Song, and Subrata Chakrabarti; 135 (5), 200-12 (2009).

Chang, Kuang-An
Parameterization of Neutrally Buoyant Horizontal Round Jet in Wave Environment — Kuang-An Chang, Yonguk Ryu, and Nobuhito Mori; 135 (3), 100-7 (2009).

Chen, Hong-Bin
Toe Scour of Seawall on a Steep Seabed by Breaking Waves — Ching-Piao Tsai, Hong-Bin Chen, and Shi-Song You; 135 (2), 61-8 (2009).

Choi, Hangseok
Case Study of Undrained Strength Stability Analysis for Dredged Material Placement Areas — Timothy D. Stark, Hangseok Choi, and Chulho Lee; 135 (3), 91-9 (2009).

Coates, L. E.
Solute Mixing in the Surf Zone — J. M. Pearson, I. Guymer, J. R. West, and L. E. Coates; 135 (4), 127-34 (2009).

Demirbilek, Zeki
Tribute to Subrata Kumar Chakrabarti — Zeki Demirbilek, Denby Morrison, and R. Cengiz Ertekin; 135 (4), 125-6 (2009).

Dias, E. Brogueira
Two-Dimensional Physical Modeling of the Northern Breakwater of Leixões Harbor, Portugal: Case Study — F. Veloso Gomes, F. Taveira Pinto, E. Brogueira Dias, and H. Guedes Lopes; 135 (6), 288-95 (2009).

Dimakopoulos, Aggelos S.
Surface Roller Model for the Numerical Simulation of Spilling Wave Breaking over Constant Slope Beach — Athanassios A. Dimas and Aggelos S. Dimakopoulos; 135 (5), 235-44 (2009).

Dimas, Athanassios A.
Surface Roller Model for the Numerical Simulation of Spilling Wave Breaking over Constant Slope Beach — Athanassios A. Dimas and Aggelos S. Dimakopoulos; 135 (5), 235-44 (2009).

Dysthe, Kristian
Waves Generated by a Pressure Disturbance Moving in a Channel with a Variable Cross-Sectional Topography — Tomas Torsvik, Geir Pedersen, and Kristian Dysthe; 135 (3), 120-3 (2009).

Ertekin, R. Cengiz
Tribute to Subrata Kumar Chakrabarti — Zeki Demirbilek, Denby Morrison, and R. Cengiz Ertekin; 135 (4), 125-6 (2009).

Gebert, Jeffrey A.
Hydraulic Study of the Chesapeake and Delaware Canal — Nicholas Dudley Ward, Jeffrey A. Gebert, and J. Richard Weggel; 135 (1), 24-30 (2009).

Gharbi, Samir
Statistical Approach to Model the Deep Draft Ships' Squat in the St. Lawrence Waterway — Claudie Beaulieu, Samir Gharbi, Taha B. M. J. Ouarda, and Ousmane Seidou; 135 (3), 80-90 (2009).

Giardino, Alessio
Hydrodynamics and Cohesive Sediment Transport in the IJzer Estuary, Belgium: Case Study — Alessio Giardino, Elsy Ibrahim, Stefanie Adam, Erik A. Toorman, and Jaak Monbaliu; 135 (4), 176-84 (2009).

Gomes, F. Veloso
Two-Dimensional Physical Modeling of the Northern Breakwater of Leixões Harbor, Portugal: Case Study — F. Veloso Gomes, F. Taveira Pinto, E. Brogueira Dias, and H. Guedes Lopes; 135 (6), 288-95 (2009).

Guymer, I.
Solute Mixing in the Surf Zone — J. M. Pearson, I. Guymer, J. R. West, and L. E. Coates; 135 (4), 127-34 (2009).

Hagen, Scott C.
Tidal Simulations for the Loxahatchee River Estuary (Southeastern Florida): On the Influence of the Atlantic Intracoastal Waterway versus the Surrounding Tidal Flats — Peter Bacopoulos and Scott C. Hagen; 135 (6), 259-68 (2009).

Heideman, John C.
Grid Point Pooling in Extreme Value Analysis of Hurricane Hindcast Data — John C. Heideman and Douglas A. Mitchell; 135 (2), 31-7 (2009).
Waves in Oceanic and Coastal Waters — 135 (3), 124 (2009).

Huang, Wenrui
Numerical Modeling of Dynamic Wave Force Acting on Escambia Bay Bridge Deck during Hurricane Ivan — Wenrui Huang and Hong Xiao; 135 (4), 164-75 (2009).

Humbryd, Chelsea J.
Variable-Height Bulkhead Design Concept for Storm Flood Protection — Chelsea J. Humbryd, Jennifer L. Irish, Diane S. Rahoy, Robert L. Alpern, and David N. Rackmales; 135 (6), 296-300 (2009).

Ibrahim, Elsy
Hydrodynamics and Cohesive Sediment Transport in the IJzer Estuary, Belgium: Case Study — Alessio Giardino, Elsy Ibrahim, Stefanie Adam, Erik A. Toorman, and Jaak Monbaliu; 135 (4), 176-84 (2009).

Irish, Jennifer L.
Storm-Wave Flow through Tidal Inlets and Its Influence on Bay Flooding — Jennifer L. Irish and Rafael Cañizares; 135 (2), 52-60 (2009).
Variable-Height Bulkhead Design Concept for Storm Flood Protection — Chelsea J. Humbryd, Jennifer L. Irish, Diane S. Rahoy, Robert L. Alpern, and David N. Rackmales; 135 (6), 296-300 (2009).

Ito, Kazunori
Current Forecast for Tunnel-Element Immersion in the Bosphorus Strait, Turkey — Yukinobu Oda, Kazunori Ito, and Solomon C. Yim; 135 (3), 108-19 (2009).

Johnson, Bradley D.
Berm and Dune Erosion during a Storm — Nobuhisa Kobayashi, Mitchell Buck, Andres Payo, and Bradley D. Johnson; 135 (1), 1-10 (2009).

Karambas, Theophanis V.
Boussinesq Model for Weakly Nonlinear Fully Dispersive Water Waves — Theophanis V. Karambas and Constantine D. Memos; 135 (5), 187-99 (2009).
Kennedy, Andrew
Book Reviews — Andrew Kennedy; 135 (3), 124 (2009).
Kim, Sung-Chan
Book Reviews — Carl F. Cerco and Sung-Chan Kim; 135 (4), 185 (2009).
Kobayashi, Nobuhisa
Berm and Dune Erosion during a Storm — Nobuhisa Kobayashi, Mitchell Buck, Andres Payo, and Bradley D. Johnson; 135 (1), 1-10 (2009).
Suspended Sand Transport along Pier Depression — Andres Payo, Nobuhisa Kobayashi, and Fumihiko Yamada; 135 (5), 245-9 (2009).
Kreiter, Stefan
Time-Dependent Deformation of Dredged Harbor Mud Used as Backfilling Material — Benjamin Friedrich Schlue, Stefan Kreiter, and Tobias Moerz; 135 (4), 154-63 (2009).
Lee, Chulho
Case Study of Undrained Strength Stability Analysis for Dredged Material Placement Areas — Timothy D. Stark, Hangseok Choi, and Chulho Lee; 135 (3), 91-9 (2009).
Li, Ying
Stochastic Model for Embayed Beaches — D. E. Reeve and Ying Li; 135 (4), 144-53 (2009).
Lopes, H. Guedes
Two-Dimensional Physical Modeling of the Northern Breakwater of Leixões Harbor, Portugal: Case Study — F. Veloso Gomes, F. Taveira Pinto, E. Brogueira Dias, and H. Guedes Lopes; 135 (6), 288-95 (2009).
Lorenzoni, Carlo
Modeling of the Wave Setup Inshore of an Array of Submerged Breakwaters — Luciano Soldini, Carlo Lorenzoni, Maurizio Brocchini, Alessandro Mancinelli, and Lorenzo Cappietti; 135 (2), 38-51 (2009).
Mancinelli, Alessandro
Modeling of the Wave Setup Inshore of an Array of Submerged Breakwaters — Luciano Soldini, Carlo Lorenzoni, Maurizio Brocchini, Alessandro Mancinelli, and Lorenzo Cappietti; 135 (2), 38-51 (2009).
Manoj, N. T.
Tidal Circulation and Salinity Distribution in the Mandovi and Zuari Estuaries: Case Study — N. T. Manoj and A. S. Unnikrishnan; 135 (6), 278-87 (2009).
Memos, Constantine D.
Boussinesq Model for Weakly Nonlinear Fully Dispersive Water Waves — Theophanis V. Karambas and Constantine D. Memos; 135 (5), 187-99 (2009).
Mitchell, Douglas A.
Grid Point Pooling in Extreme Value Analysis of Hurricane Hindcast Data — John C. Heideman and Douglas A. Mitchell; 135 (2), 31-7 (2009).
Moerz, Tobias
Time-Dependent Deformation of Dredged Harbor Mud Used as Backfilling Material — Benjamin Friedrich Schlue, Stefan Kreiter, and Tobias Moerz; 135 (4), 154-63 (2009).
Monbaliu, Jaak
Hydrodynamics and Cohesive Sediment Transport in the IJzer Estuary, Belgium: Case Study — Alessio Giardino, Elsy Ibrahim, Stefanie Adam, Erik A. Toorman, and Jaak Monbaliu; 135 (4), 176-84 (2009).
Mori, Nobuhito
Parameterization of Neutrally Buoyant Horizontal Round Jet in Wave Environment — Kuang-An Chang, Yonguk Ryu, and Nobuhito Mori; 135 (3), 100-7 (2009).
Morrison, Denby
Tribute to Subrata Kumar Chakrabarti — Zeki Demirbilek, Denby Morrison, and R. Cengiz Ertekin; 135 (4), 125-6 (2009).
Murali, K.
Wave-Induced Pressures and Forces on Deck Slabs near the Free Surface — K. Murali, V. Sundar, and Kannayya Setti; 135 (6), 269-77 (2009).
Oda, Yukinobu
Current Forecast for Tunnel-Element Immersion in the Bosphorus Strait, Turkey — Yukinobu Oda, Kazunori Ito, and Solomon C. Yim; 135 (3), 108-19 (2009).
Ouarda, Taha B. M. J.
Statistical Approach to Model the Deep Draft Ships' Squat in the St. Lawrence Waterway — Claudie Beaulieu, Samir Gharbi, Taha B. M. J. Ouarda, and Ousmane Seidou; 135 (3), 80-90 (2009).
Payo, Andres
Berm and Dune Erosion during a Storm — Nobuhisa Kobayashi, Mitchell Buck, Andres Payo, and Bradley D. Johnson; 135 (1), 1-10 (2009).
Suspended Sand Transport along Pier Depression — Andres Payo, Nobuhisa Kobayashi, and Fumihiko Yamada; 135 (5), 245-9 (2009).
Pearson, J. M.
Solute Mixing in the Surf Zone — J. M. Pearson, I. Guymer, J. R. West, and L. E. Coates; 135 (4), 127-34 (2009).
Pedersen, Geir
Waves Generated by a Pressure Disturbance Moving in a Channel with a Variable Cross-Sectional Topography — Tomas Torsvik, Geir Pedersen, and Kristian Dysthe; 135 (3), 120-3 (2009).
Pinto, F. Taveira
Two-Dimensional Physical Modeling of the Northern Breakwater of Leixões Harbor, Portugal: Case Study — F. Veloso Gomes, F. Taveira Pinto, E. Brogueira Dias, and H. Guedes Lopes; 135 (6), 288-95 (2009).
Rackmales, David N.
Variable-Height Bulkhead Design Concept for Storm Flood Protection — Chelsea J. Humbryd, Jennifer L. Irish, Diane S. Rahoy, Robert L. Alpern, and David N. Rackmales; 135 (6), 296-300 (2009).
Rahoy, Diane S.
Variable-Height Bulkhead Design Concept for Storm Flood Protection — Chelsea J. Humbryd, Jennifer L. Irish, Diane S. Rahoy, Robert L. Alpern, and David N. Rackmales; 135 (6), 296-300 (2009).
Reeve, D. E.
Stochastic Model for Embayed Beaches — D. E. Reeve and Ying Li; 135 (4), 144-53 (2009).
Reniers, Ad J. H. M.
Acceleration and Skewness Effects on the Instantaneous Bed-Shear Stresses in Shoaling Waves — Emanuele Terrile, Ad J. H. M. Reniers, and Marcel J. F. Stive; 135 (5), 228-34 (2009).
Rhee, Shin Hyung
Unsteady Reynolds Averaged Navier–Stokes Method for Free-Surface Wave Flows around Surface-Piercing Cylindrical Structures — Shin Hyung Rhee; 135 (4), 135-43 (2009).
Ryu, Yonguk
Parameterization of Neutrally Buoyant Horizontal Round Jet in Wave Environment — Kuang-An Chang, Yonguk Ryu, and Nobuhito Mori; 135 (3), 100-7 (2009).
Salehi, M.
Effects of Lime-Clay Modification on the Consolidation Behavior of the Dredged Mud — M. Salehi and N. Sivakugan; 135 (6), 251-8 (2009).
Schlue, Benjamin Friedrich
Time-Dependent Deformation of Dredged Harbor Mud Used as Backfilling Material — Benjamin Friedrich Schlue, Stefan Kreiter, and Tobias Moerz; 135 (4), 154-63 (2009).
Seidou, Ousmane
Statistical Approach to Model the Deep Draft Ships' Squat in the St. Lawrence Waterway — Claudie Beaulieu, Samir Gharbi, Taha B. M. J. Ouarda, and Ousmane Seidou; 135 (3), 80-90 (2009).
Setti, Kannayya
Wave-Induced Pressures and Forces on Deck Slabs near the Free Surface — K. Murali, V. Sundar, and Kannayya Setti; 135 (6), 269-77 (2009).
Sivakugan, N.
Effects of Lime-Clay Modification on the Consolidation Behavior of the Dredged Mud — M. Salehi and N. Sivakugan; 135 (6), 251-8 (2009).
Soares, C. Guedes
Nonlinear High Wave Groups in Bimodal Sea States — Felice Arena and C. Guedes Soares; 135 (3), 69-79 (2009).
Soldini, Luciano
Modeling of the Wave Setup Inshore of an Array of Submerged Breakwaters — Luciano Soldini, Carlo Lorenzoni, Maurizio Brocchini, Alessandro Mancinelli, and Lorenzo Cappietti; 135 (2), 38-51 (2009).
Song, Hao
Scaled Boundary FEM Model for Interaction of Short-Crested Waves with a Concentric Porous Cylindrical Structure — Longbin Tao, Hao Song, and Subrata Chakrabarti; 135 (5), 200-12 (2009).
Stark, Timothy D.
Case Study of Undrained Strength Stability Analysis for Dredged Material Placement Areas — Timothy D. Stark, Hangseok Choi, and Chulho Lee; 135 (3), 91-9 (2009).
Beach and Dune Restoration — 135 (6), 301-2 (2009).
Stive, Marcel J. F.
Acceleration and Skewness Effects on the Instantaneous Bed-Shear Stresses in Shoaling Waves — Emanuele Terrile, Ad J. H. M. Reniers, and Marcel J. F. Stive; 135 (5), 228-34 (2009).
Sundar, V.
Wave-Induced Pressures and Forces on Deck Slabs near the Free Surface — K. Murali, V. Sundar, and Kannayya Setti; 135 (6), 269-77 (2009).

Tao, Longbin
Scaled Boundary FEM Model for Interaction of Short-Crested Waves with a Concentric Porous Cylindrical Structure — Longbin Tao, Hao Song, and Subrata Chakrabarti; 135 (5), 200-12 (2009).
Terrile, Emanuele
Acceleration and Skewness Effects on the Instantaneous Bed-Shear Stresses in Shoaling Waves — Emanuele Terrile, Ad J. H. M. Reniers, and Marcel J. F. Stive; 135 (5), 228-34 (2009).
Toorman, Erik A.
Hydrodynamics and Cohesive Sediment Transport in the IJzer Estuary, Belgium: Case Study — Alessio Giardino, Elsy Ibrahim, Stefanie Adam, Erik A. Toorman, and Jaak Monbaliu; 135 (4), 176-84 (2009).
Torsvik, Tomas
Waves Generated by a Pressure Disturbance Moving in a Channel with a Variable Cross-Sectional Topography — Tomas Torsvik, Geir Pedersen, and Kristian Dysthe; 135 (3), 120-3 (2009).
Tsai, Ching-Piao
Toe Scour of Seawall on a Steep Seabed by Breaking Waves — Ching-Piao Tsai, Hong-Bin Chen, and Shi-Song You; 135 (2), 61-8 (2009).
Umeyama, Motohiko
Mean Velocity Changes due to Interaction between Bichromatic Waves and a Current — Motohiko Umeyama; 135 (1), 11-23 (2009).
Changes in Turbulent Flow Structure under Combined Wave-Current Motions — Motohiko Umeyama; 135 (5), 213-27 (2009).
Unnikrishnan, A. S.
Tidal Circulation and Salinity Distribution in the Mandovi and Zuari Estuaries: Case Study — N. T. Manoj and A. S. Unnikrishnan; 135 (6), 278-87 (2009).
Ward, Nicholas Dudley
Hydraulic Study of the Chesapeake and Delaware Canal — Nicholas Dudley Ward, Jeffrey A. Gebert, and J. Richard Weggel; 135 (1), 24-30 (2009).
Weggel, J. Richard
Hydraulic Study of the Chesapeake and Delaware Canal — Nicholas Dudley Ward, Jeffrey A. Gebert, and J. Richard Weggel; 135 (1), 24-30 (2009).
West, J. R.
Solute Mixing in the Surf Zone — J. M. Pearson, I. Guymer, J. R. West, and L. E. Coates; 135 (4), 127-34 (2009).
Xiao, Hong
Numerical Modeling of Dynamic Wave Force Acting on Escambia Bay Bridge Deck during Hurricane Ivan — Wenrui Huang and Hong Xiao; 135 (4), 164-75 (2009).
Yamada, Fumihiko
Suspended Sand Transport along Pier Depression — Andres Payo, Nobuhisa Kobayashi, and Fumihiko Yamada; 135 (5), 245-9 (2009).
Yim, Solomon C.
Current Forecast for Tunnel-Element Immersion in the Bosphorus Strait, Turkey — Yukinobu Oda, Kazunori Ito, and Solomon C. Yim; 135 (3), 108-19 (2009).
You, Shi-Song
Toe Scour of Seawall on a Steep Seabed by Breaking Waves — Ching-Piao Tsai, Hong-Bin Chen, and Shi-Song You; 135 (2), 61-8 (2009).
